

EIT Raw Materials: 2nd Greek Raw Materials Sector Dialogue

Athens, 23rd – 24th October 2017, Hilton Hotel, Vasilissis Sofias 46, Greece

You are kindly invited to the **“EIT Raw Materials: 2nd Greek Raw Materials Community Dialogue”** at Hilton Hotel, Athens on the 23rd and 24th of October 2017. The event is arranged and jointly hosted by the National Technical University of Athens (NTUA) and the Eastern Co-Location Centre (ECLC) of the EIT Raw Materials (KIC).

EIT RawMaterials along with NTUA in 2016 took the initiative to begin a series of events for the Greek Raw Material Community with a great success gathering more than 150 stakeholders in a vivid and open dialogue. The scope of these events is to foster, facilitate and enhance the Greek Raw Materials Community with strategic actions through the support of the EIT Raw Materials (KIC) community and NTUA. In this framework, the event this year is back and the **“EIT Raw Materials: 2nd Greek Raw Materials Community Dialogue”** will bring together the industry (large and SME), the governance (national and regional), academia and research institutes of Greece along with executive European organizations of the Raw Materials sector as members of the EIT Raw Materials (KIC) to discuss over a new supporting tool for the sector and stakeholders, **the Regional Center Greece**.

The central target of the event is to announce the establishment of the **Regional Center Greece**. The promise of NTUA and ECLC to create a support center, which was announced on the “1st Greek Raw Materials Community Dialogue” is now a reality and you are welcome to join and participate to the discussions for the future actions of it.

Regional Center Greece, is the first attempt of EIT Raw Materials (KIC) to establish a hub in a RIS country, Greece, and will act as role model Hub to deliver relevant experience for best practice in other Hubs. The scope is to engage and stimulate the Greek Raw Materials Community in a single point and act as a one-stop shop through actions in multiple directions (innovation, policy, industry, authorities, society) in line with EIT RM Agenda, Greek National Mineral Policy and SIP of EIP. The aim of the Regional Center Greece is to become the central RIS for Greece and Cyprus.

The **“EIT Raw Materials: 2nd Greek Raw Materials Community Dialogue”** program includes several invited high level speakers from EU and Greece. These talks will set the current state in the Greek and EU raw materials sector, address the Knowledge Triangle (academia, research, industry) in political level, present tools and initiatives in EU and Greece that act as facilitators for the sector, examine the innovation needs in Knowledge Triangle and governance, and present the background and foreground of Regional Center Greece. In addition, 2 Sessions with open plenary discussions with thoughts, ideas, suggestions, objections and wishes over the Regional Center Greece establishment will take place in a workshop form to claim feedback from the Greek stakeholders and set the framework for future actions.

In connection with the meeting you are invited to a Cheese and Wine Cocktail in the Roof Garden restaurant of the Hilton Hotel with a direct view to the city center and the Acropolis on the 23rd of October.

ECLC KIC and NTUA are urging you to contribute during the event your thoughts and participate actively in the discussion in order to act as catalysts to the new tool for our community, Regional Center Greece. Kindly confirm your participation to the **“EIT Raw Materials: 2nd Greek Raw Materials Community Dialogue”** to [Registration Area](#) no later than the 16th of October. There is a restricted number of participants to 150 persons and we will communicate with you to confirm your registration.

You are welcome to contact the administrative group of NTUA through [Eirini Kostopoulou](#) for any enquiry or information required.
